EXPERIENCE

Buildrappo

Remote

Software Development Intern

Feb 2025 – April 2025

- Worked on customer-facing product features, performance improvements, and integrating backend APIs.
- Optimised the load time and performance.

Gumroad

Remote

Software Engineer — Freelance

Sept 2025 – Feb 2026

- Merged 45+ PRs across Gumroad, Flexile, and Gumboard, focusing on frontend improvements and product polish.
- Resolved UI inconsistencies, responsive layout issues, dialog/navigation bugs, and form UX problems across customer-facing flows.
- Contributed E2E test fixes and migrated legacy inline CSS/SCSS components to Tailwind CSS.

PROJECTS

Bondify | Next.js, Tailwind CSS, Zustand, React PDF

Feb 2026

- Built a free marriage biodata maker tool with multiple professionally designed pre-built templates and real-time PDF generation support.
- Implemented fully customizable biodata editing with image uploads, live previewing, global state management using Zustand, and responsive UI using Tailwind CSS.

Vote It | React.js, Firebase, TailwindCSS

April 2024

- Interactive real-time voting platform using Firestore for instant updates and Redux for state.
- Secured system using Firebase Authentication with protected user flows.

Idea Vault | React, TailwindCSS, Supabase, AI Embeddings

March 2024

- Built AI-powered thought logging app using Cloudflare Workers, D1, and Drizzle ORM for fast storage.
- Semantic vector search integration using BGE embeddings for relevant thought retrieval.

OPEN SOURCE CONTRIBUTIONS

Zeromail (YC W24)

- Enhanced message rendering reliability and refined UX in critical communication flows.

Cal.com

- Fixed UI bugs in scheduling flows improving overall usability.

Morphik (YC W22)

- Improved navigation and real-time interactions in core frontend pages.

EDUCATION

DIT University

Dehradun, Uttarakhand

B.Tech in Computer Science

2021 – 2025

Modern Public School

Motihari, Bihar

Intermediate

2018 – 2020

SKILLS

Languages: JavaScript, TypeScript, Python

Frontend: React.js, Next.js, Astro.js, TailwindCSS, TanStack Query, TanStack Table, React Hook Form, Zustand, ShadCN

Backend: Node.js, Express.js, Hono, WebSockets, PostgreSQL, MongoDB, Firebase, Prisma, Redis, REST APIs

Tools: Git, Docker, CI/CD, AWS, Vercel, Nginx, Cloudflare, Figma
